

MMT MIG-GUNS

The new series of MIG guns

MMT MIG guns are designed to be used with Kemppe's Kempomat and Kempoweld welding machines or with any brand of MIG welding machine equipped with a Euro connector. MMT MIG guns continue the successful design and ergonomics of PMT MIG guns, having the same flexibility and lightness in handling resulting in superior welding performance.

- Ergonomic design with lightweight and well-balanced grip
- New sticky handle surface, no strain on welder's wrist
- Excellent gas shielding reduces porosity
- Easy to position for welding due to rotating neck
- Maintenance friendly construction
- Shock resistant, reliable switch
- Durable protective hose material
- Low friction DL-Teflon liner for aluminium and stainless steel
- No water leakage's during the maintenance (plugs)
- Small amounts of consumable parts (only two contact tip lengths)
- Euro adaptor
